Propagandistic methods used by the communists to make youngsters join the Party.

Very often lectures are being given to the Albanian Youth by faithful communist members. Generally the speakers in such lectures give a most dark picture of the life of youngsters in the capitalistic countries,, saying that the government of these countries show a complete indifference towards the youth. Only the children of rich families are liable to hold important positions in the government etc. The poor unable to face the economic pressure are forced to form the working class of tomorrow.

Morale of the people.

The Albanian population is much terrorized and desparate becauseof the economic misery. The population realizes now that the promises of the government to the effect that five years after they had taken over power the problem of life would be faced easely, were false. They realize with regret that the situation is becoming worse and worse every day.

This on one hand and the fact that nobody can protest against this situation, because he knows what's waiting for him, are the reasons for the very low morale of the Albanian population.
